# 1 Document conventions

## 1.1.1 Notes, tips, and warnings

Notes, definitions, tips, warnings, and check points are used throughout the document, emphasized by their respective icons, as illustrated below.

| | |
|---|---|
| **NOTE**: Used to represent a note. | |
| **DEFINITION**: Used to define terms. | |
| **TIP**: Used to convey a useful tip. | |
| **WARNING**: Used to explain the warnings and critical issues. | |
| **CHECK POINT**: Used as a check point.<br>Example: At this point you should have the following components installed:<br>• 1st component<br>• 2nd component, etc. | |

# 2 Introduction

## 2.1 About this document

This document describes the DORA release version 1.0.0. It includes everything you need to know about this release, including the engine upgrade, related applications and all else associated with it.

## 2.2 About this release

This release contains:

- **Introduction of DORA-ROI-CON and DORA-ROI-IND Modules**

Engine documentation can be found on the OneSumX FRR Knowledge Portal Engine Documentation

- OneSumX Regulatory Reporting RP Web Client (RG TNG)
- OneSumX Regulatory Reporting RP Desktop (RG Desktop)
- OneSumX Regulatory Reporting Engine

## 2.3 Precautions

General precautions to be taken.

1. It is MANDATORY to install RG Desktop 1.22.10 / RG TNG 2.27.10 / RE 4.9.10.
2. Save the zip file and unzip it to a local folder.
   Note that it is required to preserve the timestamps of the files included in the zip file. When using a third-party extraction tool like 7-zip, WinRAR, WinZip or most other the default behaviour is to preserve the timestamps. However, when using the in-built ability of Windows to extract zip files, preserving the timestamps is **NOT the default behaviour**. For a more detailed explanation of how to ensure that the timestamps are preserved correctly refer to the DORA 1.0.0 - RG Installation and Configuration Guide.

## 2.4 Related documents

DORA Release documentation is available on the new platform for documentation 'OneSumX FRR Knowledge Portal'. In case the link is not working, please use the below links:

OneSumX FRR Knowledge Portal DORA Documentation

# 3 Management summary

## 3.1 Scope

| Scope | Details |
|---|---|
| New development | • Introduction of DORA-ROI-CON and DORA-ROI-IND Modules. |

### 3.2.1 Engine Compatibility/Dependency

**Engine Compatibility:**

- This DORA 1.0.0 release is supported on the following versions of the engine (RG Desktop 1.22.10/ TNG 2.27.10/ RE 4.9.10)
- The installation of the .NET Framework 4.8.0 is required. The package is available in the installation kit of OneSumX ReportGenerator 1.22.
- The installation of the x64 .NET Desktop Runtime 8 is required on version 1.22.10.

# 4 Supported and delivered components

## 4.1 Supported components.

| RDBMS | Supported Version(s) |
|---|---|
| Oracle | Oracle 19c<br><br>The Oracle client version required is 19.3.0.0 (32 bits) |
| MS SQL Server | SQL Server 2022<br><br>SQL Server 2019<br><br>Microsoft ODBC Driver 17 for SQL Server<br><br>The installation of the .NET Framework 4.8.0 is required. The package is available in the installation kit of OneSumX ReportGenerator 1.22.<br><br>The installation of the x64 .NET Desktop Runtime 8 is required on version 1.22.10<br><br>For more details please refer to the OneSumX ReportGenerator RG Desktop 1.22.10 - Hardware and Software Requirements document. |

### Prerequisites in RG Desktop 1.22.10 and RG TNG 2.27.10 and RE 4.9.10

When installing ReportGenerator Engine RG 1.22.10 or RG TNG 2.27.10 or RE 4.9.10, please refer to the engine documentation for the changes required.

Documentation can be found on the OneSumX FRR Knowledge Portal Engine Documentation

- OneSumX Regulatory Reporting RP Web Client (RG TNG)
- OneSumX Regulatory Reporting RP Desktop (RG Desktop)
- OneSumX Regulatory Reporting Engine

## 4.2 Delivered components.

| Components | File Name |
|---|---|
| DORA 1.0.0 | DORA 1.0.0.zip |

Refer to the DORA 1.0.0 - RG Installation and Configuration Guide located at our OneSumX FRR Knowledge Portal DORA Documentation for more information.

The content of the zip file includes three folders:

- Descriptors
- LDM
- META-INF

If you are using OneSumX Regulatory Reporting RP Web Client (RG TNG) or OneSumX Regulatory Reporting RP Desktop (RG Desktop) as an engine you can ignore and delete the two folders 'Descriptors' and 'META-INF'.

As a OneSumX Regulatory Reporting Engine user, however, you need to keep all four folders when uploading the package.

# 5 Performance testing

### 5.1.1 Software Components

The test was executed using the following components.

- DORA Regulatory Application 1.0.0
- OneSumX Regulatory Reporting RP Desktop (RG Desktop) 1.22.10
- OneSumX Regulatory Reporting RP Web Client (RG TNG) 2.27.10

## 5.2 Benchmark Results

N/A.

# 6 Functional guide

## 6.1 DORA 1.0.0

Param changes with functional impact can be found in chapter 9 Fixed issues.

# 7 Changes

## 7.1 Regulatory Changes

N/A

## 7.2 New development

We are pleased to announce the development of the Digital Operational Resilience Act (DORA) Return on Investment (ROI) modules, DORA-ROI-CON and DORA-ROI-IND. These modules facilitate compliance with DORA, which was published by the European Banking Authority (EBA) in September 2024. (eba.europa.eu)

**About DORA**

The Digital Operational Resilience Act (DORA) (Regulation 2023/2554) establishes a comprehensive framework for digital operational resilience across EU financial entities. While all financial sector entities must comply with DORA, critical third-party ICT service providers (CTPPs) will also be subject to an EU-level oversight framework. (eiopa.europa.eu)

DORA became applicable on January 17, 2025. From this date, all in-scope financial entities are required to maintain a comprehensive register of their contractual arrangements with third-party ICT service providers at the entity, sub-consolidated and consolidated levels. (eba.europa.eu)

The European Banking Authority (EBA) has introduced version 4.0 of its Data Point Model (DPM) to enhance the reporting framework under the Digital Operational Resilience Act (DORA). This update aims to standardize data reporting, ensuring consistent identification of business concepts and their interrelations, along with validation rules. EBA reporting framework 4.0 is expected to apply **as of reference date 03/2025**.

**Purpose of the Registers**

The information registers serve three main purposes:

- Financial entities: Monitor third-party ICT risks.
- EU competent authorities: Supervise ICT risk management and third-party risk at financial entities.
- European Supervisory Authorities (ESAs): Designate critical ICT third-party providers (CTPPs) that will be subject to EU-level oversight.

**DORA-ROI-CON and DORA-ROI-IND Modules**

Under the Digital Operational Resilience Act (DORA), financial entities are required to maintain a Register of Information (RoI) concerning their contractual arrangements with third-party ICT service providers. This register must be maintained at three distinct levels: individual, sub-consolidated, and consolidated.

- **Individual Level**: Each financial entity is obligated to maintain and regularly update the RoI at the individual level. This ensures that every entity has a clear and comprehensive record of its own ICT third-party arrangements, facilitating effective monitoring and management of ICT risks.
- **Sub-Consolidated Level**: For financial entities that are part of a group, the RoI must also be maintained at the sub-consolidated level. This involves consolidating the ICT third-party arrangements of specific subsets within the group, providing a focused view of ICT dependencies and risks within particular segments of the organization.

- **Consolidated Level**: At the highest level, the RoI must be maintained on a consolidated basis, encompassing all ICT third-party arrangements across the entire group of financial entities. This holistic approach ensures that the group can effectively oversee and manage ICT risks, maintaining digital operational resilience throughout the organization.

The **DORA-ROI-CON** (consolidated and sub-consolidated) and **DORA-ROI-IND** (individual) modules are designed to assist financial entities in compiling and managing these registers at the respective levels, ensuring compliance with DORA's requirements. By utilizing these modules, entities can systematically document and monitor their ICT third-party service arrangements, thereby enhancing their digital operational resilience.

DORA-ROI-CON and DORA-ROI-IND consist of 15 annual reports designed to help financial entities comply with DORA's reporting requirements. The implementation includes:

- Direct allocation via the RT5000
- Validation rules to ensure data accuracy
- Automated delivery in the XBRL CSV format will be available soon, as the recent release of DPM 4.0 has delayed its implementation.

| Report Name | Template | Frequency | Automation | Direct Allocation | Validation | Electronic Delivery | Delivery file format | Mapped |
|---|---|---|---|---|---|---|---|---|
| RT.01.01: Entity maintaining the register of information | B_01.01 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.01.02: List of entities within the scope of the register of information | B_01.02 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.01.03: List of branches | B_01.03 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.02.01: Contractual arrangements - General Information | B_02.01 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.02.02: Contractual arrangements - Specific information | B_02.02 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.02.03: List of intra-group contractual arrangements | B_02.03 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.03.01: Entities signing the Contractual arrangements for receiving ICT service(s) or on behalf of the entities making use of the ICT service(s) | B_03.01 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.03.02: ICT third-party service providers signing the Contractual arrangements for providing ICT service(s) | B_03.02 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.03.03: Entities signing the Contractual arrangements for providing ICT service(s) to other entity within the scope of consolidation | B_03.03 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.04.01: Entities making use of the ICT services | B_04.01 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.05.01: ICT third-party service providers | B_05.01 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.05.02: ICT service supply chains | B_05.02 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.06.01: Functions identification | B_06.01 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.07.01: Assessment of the ICT services | B_07.01 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |
| RT.99.01 Definitions from Entities making use of the ICT Services | B_99.01 | Annual | Manual | Yes | Yes | Yes | XBRL CSV | Manual |

These modules enable financial institutions to efficiently manage their ICT third-party risk and meet DORA compliance requirements seamlessly.

For more information on DORA compliance and reporting guidelines, visit the European Banking Authority (EBA) website: (eba.europa.eu)

## 7.3 Decision table changes

N/A

## 7.4 New data requirements

N/A

## 7.5 Changes in the lookup table values.

**N/A**

## 7.6 Direct Allocation

Direct allocation via RT5000 has been implemented for DORA-ROI-CON and DORA-ROI-IND.

Please refer to DORA-ROI.xlsx document published on the OneSumX FRR Knowledge Portal DORA Documentation for detailed information regarding the creation of test data (see testdatacreation tab), the usage of dynamic keys per report and the list of allowed values for each report and column (refer to List_of_values tab).

# 8 Fixed issues

N/A.

# 9 Technical impact of changes

N/A.

# 10 Interface impact of changes

N/A.

# 11 Known issues

## 11.1 Delivery process

| Issue | Details |
|---|---|
| Issue 1 | Due to the recent release of DPM 4.0, automated delivery in XBRL CSV format is still being finalized and will become available in the upcoming days. |
| Component | Delivery |
| Workaround | Delivery process will be made available in the upcoming days. |

# 12 Upcoming changes

N/A.

# 13 Glossary

| Term | Description |
|---|---|
| Application abbreviation e.g., BEA | Complete application name e.g. OneSumX Regulatory Reporting DORA Application |
| Allocation | Allocating data from the LDM to fields within the Reports |
| DF | Data Foundation |
| FA | Financial Analytics |
| GDM | Global Data Model – Data Foundation or the Mapping database |
| GL | General Ledger |
| Interface | The Interface is the mapping of fields in the back office or source systems to Data Foundation tables |
| LDM | Local Data Model – the Param database |
| Mapping | The mapping of L2 tables from Data Foundation to the LDM |
| ODBC | Open DataBase Connectivity |
| Param | The Param or the Application is the implementation of one or more reports and schedules. It contains all of the related report specific files. The Param when installed with the Report Generator is used to create reports, audit and validate entries, and deliver reports. |
| Recs_Types | Record Types. Names of tables from which reports allocate report cell data. |
| ReportGenerator | The engine that captures and validates data, populates reports, generates delivery files and automates the production of regulatory reports. |
| ReportGenerator TNG | Also known as RG TNG, is similar to Report Generator but the user interface is through a WEB browser. |

| Term | Description |
|---|---|
| XX | Any country |
| Y.Y.Y | Version number in a format using a dot delimiter (e.g., 1.4.2) |
| Y.Y | Version number in a format using a dot delimiter (e.g., 1.4) |
