1 Management summary

The solution consists of a new Platform with the FINREP solution.

Solution definition		
Platform	**Regulatory Analytics**	**Regulatory Reporting**
24.12	**N/A**	**FINREP 20.6.0**

Table 1. Release overview

Module	Reports	Install	Calculator	Regulatory Reporting	Interface	Regulatory Updates
FINREP9_IFRS	**F01-26, 30-31, 40-47**	✓	×	✓	×	✓
FINREP9_GAAP	**F01-26, 30-31, 40-47**	✓	×	✓	×	×

Who should install

- This release is for customers doing their FINREP IFRS/GAAP reporting with direct allocation or delivering data directly to the Standard Record

Are interface changes needed

No

Regulatory changes

FRRFINREP-21183: EBA issues revised list of ITS validation rules in the FINREP context.

Description: The European Banking Authority (EBA) issued a revised list of validation rules in its Implementing Technical Standards (ITS) on supervisory reporting, highlighting those, which have been deactivated either for incorrectness or for triggering IT problems. Competent Authorities throughout the EU are informed that data submitted in accordance with these ITS should not be formally validated against the set of deactivated rules.

Scope of validations deactivated for Asset Encumbrance vs. FINREP: v2814_m, 2853_m.

Solution: The following rules were deactivated for: v2814_m and2853_m.

Included fixes

- **FRRFINREP-21269: Customer Owner user table not visible on RE UI**

Description: The user table customer-owner is not visible on the RE UI. However, the same table is present in the physical DB.

Note: This table was renamed in Finrep 20.3.0.

Solution: Updates were made, and Finrep Customer Owner is now visible again for the customers.

- **FRRFINREP-21238: FINREP Documentation - Incorrectly indicated XBRL schemes**

  Description: In the workflow and user guide, it is mentioned that the *http://standard.iso.org/iso/17442* scheme is needed for DPM 3.2 reporting, while the *https://eurofiling.info/eu/rs* scheme is for UKA. Actually, *http://standard.iso.org/iso/17442* is used by UKA customers because they are still on DPM 3.0, and *https://eurofiling.info/eu/rs* is intended for reporting modules on DPM 3.2 or higher.

  Solution: The update on documentation is now available in the workflow and user guide document.

- **FRRFINREP-20932: FRA FilingIndicator report json file need to be updated**

  Description: The descriptions of the cells in the FilingIndicator report are not the ones for the FRA module; they are the vanilla ones, so we need to update it to use the allocation for FRA instead of the vanilla ones for the cell's descriptions in the JSON file.

  Solution: The UI descriptions for the Filing Indicators report have been updated to be in line with the nGAAP FRA Filing Indicators allocation.

- **FRRFINREP-20850: FINREP Allocation - Wrong formula in FINREP F02_00**

  Description: The formula in FINREP F_02_00 for cell 0355_0010, Total Operating Income NET, is incorrect. Comparing the formula with the one sent by a client, we see that Cell 0090_0010 (Interest Expenses) is missing.

  Solution: Corrected formula for F02.00 row 0355 and row 0610.

- **FRRFINREP-20229: Define parameters of the entity in the Reporting entities table**

  Description: Currently, some parameters regarding the enrichment process are defined as default values in the **Processing Parameters** section. In the case of reporting for multiple entities, customers must change on every execution of an enrichment (for example, Finrep) the 'institution' and 'extensions' when the job is launched for one of the other entities, which differ from the default value.

  In RG-Desktop/RG-TNG, all entity-related parameters are defined in the **Financial institution** table, and no manual adjustment is needed.

  Solution: We have moved *executeGeographicalBreakdown* and *consolidationLevel* parameters to Reporting Entity custom parameters and removed extensions.

  The *extensions* processing parameter was marked as obsolete and removed. The *institution* was kept as a processing parameter since this enables the customers to set the main institution to be used. Having this removed would result in the reporting party always matching with the internal party, leading to domestic as the location of the activities for every input.

- **FRRFINREP-20679: FilingIndicator report cell _F_NPE__Col030 is set to "Y" or "N" and our formulas are expecting "No"**

  Description: The allocation formulas must be aligned; generally, the Y/N values are used but for NPE parameters "Yes" or "No" is expected.

  Solution: _F_NPE__Col030 switched from "No" to "N" in filling indicators.

Next release

The next release is foreseen to be published between 21 and 30 April 2025.

New development

- **FRRFINREP-21005: LDM-only solution - SR_FINREP_POS support for allocations (excl. dynamic reports)**

  Description: As a User, I want a more DF-based solution so that metrics, and dimensions from the EBA taxonomy are not used for allocation purposes on data points related to the balance sheet, P&L items (excluding information on collaterals and netting).

  Solution: A new standard record was developed (SR_FINREP_POS) that is in Wolters Kluwer's vocabulary (closer to DF) and also leverages the advantages of structured codes. Customers can work out capture data based on their LDM data from the current platform and use it for allocation, validation, and delivery on FINREP IFRS templates.

- **FRRFINREP-21004: LDM-only solution - SR_FINREP_MOV support for allocations**

  Description: As a User, I want a more DF-based solution so that metrics, and dimensions from the EBA taxonomy are not used for allocation purposes on data points related to movements.

  Solution: A new standard record was developed (SR_FINREP_MOV) that is in Wolters Kluwer's vocabulary (closer to DF) and also leverages the advantages of structured codes. Customers can work out capture data based on their LDM data from the current platform and use it for allocation, validation, and delivery on FINREP IFRS templates.

Where can I find more information

For more information on compliance, explore the Get Ready for Basel IV & CRR III in the OneSumX FRR Knowledge Portal, section "Get Ready for Basel IV & CRR III". We strongly recommend checking out our interactive map to uncover your guide to compliance.

Warning:
As this is a new solution, contact Professional Services to manage the installation and receive training. These activities are not supported via the helpdesk until you are in production. Contact your OneSumX account manager.

2 Scope

FINREP 2025.02 is an end-to-end solution release. For the indicated FINREP reports this release includes the following:

- Regulatory Reporting templates based on the Regulatory Engine 7
- Calculators supporting these reports
- DataFoundation as the entry point into OneSumX

Any exceptions in coverage in FINREP 2025.02 will be explained in the Known Issues section.

Note:

If a column shows multiple releases, it means that subsequent releases will cover any exceptions and final regulatory changes that the regulator will communicate only in 2025.

* Baseline is the existing DataFoundation interfacing requirements

For moreinformation on the scope of Calculations and Regulatory Reporting, see the following sections.

Calculator scope

Supported calculations in this release (including published test cases):

- LTV Calculation
- Transferred Assets
- Collateral Process
- Netting Process
- Structured Code (pre-delivered)

Supported calculations in future release:

- Structured Code (calculated)
- Fetching risk weight and default calculations from COREP CRR III Solution

* For FINREP IFRS/GAAP reporting with direct allocation or delivering data directly to the standard record.

** For Germany and France only.

3 Operational impact

With the FINREP 2025.02 solution customers can load data into DataFoundation (refer to the FINREP 2025.02 Interfacing Guide) and execute an enrichment that will perform calculations and mappings which will produce a FINREP Standard Record for visualizing the results of this process incl. data lineage. This release is for customers doing their FINREP IFRS/GAAP reporting with direct allocation or delivering data directly to the Standard Record. These reports can be verified using EBA validation rules and delivered via XML or XBRL to regulators.

For end-to-end testing purposes of the taxonomy-based reporting (DF-FDM-Enrichment-Allocation-Delivery workflow), we are offering in this release the following IFRS EBA Quarterly reports: F04.01-F04.05, F05.01, F06.01, F20.4, F20.7.1.

End-to-end testing of Wolters Kluwer vocabulary-based reporting will be possible with a future release.

4 Supported and delivered components

4.1 Supported components

You need to download the components from the according to the instructions provided in the release email that you receive.

Table 1. Engine components are a prerequisite to installing the content libraries

Component	Version	Details
	24.12	**Docker Compose script (DXG approved credentials required)**
Reporting Hub	**6.12.2**	
Admin Center	**6.12.2**	
Processing Engine	**10.12.2**	
Lineage	**5.12.4**	
Delivery Engine	**2.12.1**	

Note:

OneSumX Regulatory Engine is a reporting component of the Platform for FINREP, which turns data into regulatory reports and covers the reporting process from data input to delivery file generation.

The next compatible platform version with the FINREP Solution 2025.02 is Platform 25.01.03 or higher.

Note:
When using the Docker version, you need to download only the Platform for FINREP Docker Compose configuration zip that includes the following components:

- Reporting Hub
- Admin Center
- Processing Engine
- Lineage
- Delivery Engine
- OneSumX for Risk

Note:
OneSumX for Risk (database, engine or any docker script) isn't required for standalone FINREP. If FINREP is used in conjunction with other OneSumX solutions that may require OneSumX for Risk such as ALM, FTP, IRRBB, COREP, LIQREP, MREL, Pillar 3, MREL and SHSG. For more information, contact support.

4.2 Delivered components

Table 1. FINREP components

Component	Version
FINREP 2025.02	***FINREP 2025.02.zip***
FINREP	**20.6.0 (included in the FINREP 2025.02 package)**
Financial Data Model	**3.21.2 (latest included in the FINREP 2025.02 package)**
DataFoundation	**3.48.3 (included in the FINREP package)**

5 Known issues

Known issues in this release

- Performance
- Enrichments
- Allocations
- Delivery
- Validations
- Lineage

5.1 Performance

- FRRBLP-3319 - Vertical Scaling: The effect of vertical scaling is limited to 40 CPUs.
- FRRBLP-2680 - Horizontal Scaling: Multiple nodes on Kubernetes are not supported.
- FRRFINREP-20504/FRRFINREP-20355/FRRFINREP-20671/FRRFINREP-20672/FRRFINREP-20793/FRRBLP-2859/FRRBLP-2930 - Contrary to our recommendation, more off-heap memory (50-100 GB) is needed to achieve convenient performance timing when lineage is activated.

5.2 Enrichments

- FRRFINREP-20179 - Data lineage is not supported for XXL data sizes and above.

5.3 Allocations

- FRRFINREP-21087 - Post-processing logic is not calculating the proper averages for F47. The item will be fixed in the upcoming releases.

5.4 Delivery

- FRRFINREP-19682/FRRBLP-10306 - Improper handling of null data points for the filing indicator calculation. Customers must manually overrule the filing indicators in the **FINREP_Filing_Indicators** report, column 020.

5.5 Validations

- FRRFINREP-21222/FRRREG-45621 - EGDQ validations are executed every time (cannot be turned off)
- FRRFINREP-19286/FRRRB-17506 - DNB validations with fixed tolerance will be implemented in the upcoming releases.
- FRRFINREP-19865/FRRREG-50563 - Inaccurate execution of the rules v10681_m, v1160_m and v7875_m. These rules should be disregarded.

5.6 Lineage

- FRRFINREP-21527/FRRUI-5905 - Lineage is producing an error message from result sets. Customers must upgrade to Platform 25.01.03 or a higher version to benefit from the fix.

6 Contact

- For questions or issues related to the product or solution, raise a support ticket through our FRR Community.
- For questions about your support ticket or to subscribe additional email addresses to release notifications, email FRR-Support@wolterskluwer.com.
- To request support for implementation from our Professional Services team or to request a training session, contact your account manager or sales representative from Wolters Kluwer.
